PROJECT PROPOSAL

Project Name: HermosoWeb

December 16, 2025

M1,M2(**Sachin Sourav, Rounaque Afroz**)

Overview

HermosoWeb is a student-powered website development platform that provides affordable web solutions to individuals, startups, and small businesses. The platform connects clients with student developers, allowing students to gain real-world project experience while ensuring quality delivery through team leaders.

Input

• Client website requirements
• Design preferences and content
• Student development teams

Output

• Fully functional and responsive websites
• Affordable pricing for clients
• Skill development and industry exposure for students

Design Overview

The system follows a team-based development approach. Each project is handled by a group of students under a group leader who manages task distribution, progress tracking, and quality control.

Technical Stack

Frontend: HTML, CSS, JavaScript
Backend: Node.js
Database: MySQL

Goals / Checkpoints

1. Requirement analysis and planning
2. UI/UX design and development
3. Backend and database integration
4. Testing and final deployment
